

# MemoClock™

Camera, DVR & Motion Detector  
Hidden in Antique-style Clock

Records on removable memory card

## Ideal For Covert Recording

Video Domain Technologies' new **MemoClock** is beautifully modeled on an antique wooden clock, with camera and video motion activated DVR hidden inside. It is completely self-contained, totally secure and easy to use.

### For the Office Executive

- See who tried to access your computer
- See who entered your office after hours
- See who is tampering with your confidential documents

### For Home & Family

- Is the babysitter spending time with the baby or talking on your phone?
- What set off the alarm if the police couldn't find anything?
- When did your housekeeper leave?

### For Store Owners

- See whether you have been burgled.
- See who is shoplifting. Customers? Maybe suppliers?
- See that your sales people are depositing all the earnings

### For Security Officers

- Make sure only authorized personnel enter
- Have a picture of all unauthorized people
- Monitor the executive offices area

Based on our award-winning **MemoCam**® technology.

Video Domain Technologies

# MemoClock™

## Advanced Camera +DVR + Video Motion Detector

### Simply Plug in - and Ready for Action!

No need to hassle with complicated camera and DVR/VCR wiring, or wireless cameras that transmit your images all over the neighbourhood.

All you do is touch the "arm" button on the convenient wireless remote control. The clock will beep once to verify command and quality video recording will begin the instant motion is detected.

When you are ready to review your video images, simply press the "disarm" command on the remote control and remove the small SD card from its hidden compartment.

Insert the SD card into the card reader which we include in the MemoClock package, and see the recorded images, with time and date stamped for integrity, on any PC/Pocket PC.

You can speed up, slow down, or zoom in during playback. You can save the card or download your images to a storage media (CD, hard drive, etc.). **MemoClock** supports up to 1GB card storage.

#### Features

- \* 0.5 Lux color camera
- \* Integrated new advanced Video Motion Detection (VMD)
- \* Up to 10 FPS
- \* Smart alarm activation
- \* Resolution quality 640x480 (VGA) or 320x240 (CIF)
